

# The xShare Industry Label

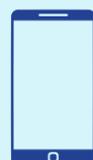

## Experimental EEHRxF conformance - 2026

An experimental, voluntary, pre-regulatory certification designed to help EHR systems and wellness app manufacturers demonstrate their technical readiness for the European Electronic Health Record Exchange Format (EEHRxF).

Patient portals

National health apps

EHR systems

The label operates across three progressive levels – Bronze, Silver, and Gold – each reflecting increasing levels of technical maturity, interoperability capacity, and real-world integration.

The **Bronze Label** is the entry point into the xShare labelling system, designed to encourage early-stage engagement by lowering the barriers to demonstrating interoperability. At this level, certification is achieved entirely through a self-declared conformance process.

The **Silver Label** signifies a more advanced stage of interoperability maturity. At this level, systems must demonstrate the ability to both consume and produce EEHRxF-conformant data, establishing bidirectional interoperability.

The **Gold Label** of the label represents the highest level of xShare certification, designed to recognise organisations that are technically and operationally interoperable and embedded within national or regional digital health ecosystems.
